network.

Primary treatment network

Primary treatment network

It would be impossible to provide precautionary treatments across the entire road network and our priority is to firstly keep major transport and freight links clear such as A and B roads and to target routes which carry high volumes of traffic.

Extended treatment network

The extended treatment network will only be treated when prolonged freezing and/or snow conditions are expected; it will not be treated in marginal weather conditions when such extended periods of ice and snow are not expected

Please note: Enter your street name or postcode in the search below to zoom to your location. You may then need to zoom out to see your nearest grit bin and gritted streets.
